SUMMARY

Software Engineering undergraduate in the final stage of a Higher Diploma in Software Engineering, with hands-on experience gained through a six-month full-stack software engineering internship. Skilled in developing scalable web applications and RESTful APIs while following clean code principles and best practices. A fast learner who quickly adapts to new technologies and AI-assisted development. Passionate about building high-quality software and growing as a full-stack software engineer.

TECHNICAL SKILLS

Backend Development :

Java, Spring, Spring Boot, Java EE, Node.js, Express.js, Fastify, Hibernate, JPA, Python, REST APIs, JWT

Frontend Development :

HTML, CSS, TypeScript, JavaScript, React, Next.js, Bootstrap, Tailwind CSS, jQuery, JavaFX, React Native, Figma (UI/UX Design)

Databases & Persistence :

MySQL, MongoDB, Firestore, JDBC, Object-Relational Mapping (ORM), Prisma(ORM)

Tools & Platforms :

IntelliJ IDEA, Visual Studio Code, NetBeans, Postman, Scene Builder, Swagger UI, GitHub, Linux, MongoDB Compass, JasperSoft Studio, Firebase, Vercel, Cisco Packet Tracer, AWS

Architectures & Concepts :

MVC Architecture, Layered Architecture, Design Patterns (Singleton, Factory), Object-Oriented Programming (OOP), Programming Fundamentals, Computer Networking

EXPERIENCE

Freelance Full-Stack Developer | Part-Time | Oct 2025- present

Project: Theta Lounge – Floating Therapy Business | MERN - Stack

Live Website : <https://thetalounge.com>

- An end-to-end appointment and management system for Sri Lanka's first floating therapy business.
- Enabled clients to book sessions by selecting time slots and packages, and track appointment history, completed sessions, and expiry status.
- Built a multi-admin platform with analytical dashboards and reports to manage therapy tank schedules, open/close days and times, pricing, packages, approvals, cancellations, and system access.
- Implemented secure authentication and real-time email notifications for bookings, payments, and status updates.

Software Engineering Intern | Full-Time | Remote

Code3x (Pvt) Ltd. | Colombo, Sri Lanka | Mar 2026 – Sep 2026

Project: Rentzee – Vehicle Rental Platform

- Developed and maintained scalable backend services and RESTful APIs using Node.js, Fastify, and TypeScript, while contributing to frontend development with React.
- Implemented new features and resolved bugs based on business requirements, collaborating with the development team to deliver reliable and high-quality software.
- Worked extensively with Git and GitHub, including branch management, creating and reviewing pull requests, resolving merge conflicts, and maintaining code quality through peer reviews.
- Followed Agile Scrum practices by participating in daily stand-up meetings, sprint planning, and retrospective sessions, while managing development tasks using Jira.
- Assisted with CI/CD workflows by deploying application updates to the staging environment using GitHub Actions and validating features before release.
- Collaborated with cross-functional team members to test, debug, and maintain applications while following clean code principles and software engineering best practices.

PROJECTS

Adlync – Smart Classified Ads & Marketplace System | Spring Boot | Aug 2025 – Present

Developed a full-stack marketplace with role-based user management (Admin, Moderator, User). Enabled users to post/view ads, manage profiles, make payments, and chat with sellers in real-time. Admins and moderators can approve/reject ads, review payments, and manage reports/ratings. Implemented secure authentication (JWT, Google login), image uploads, and responsive UI.

- **Tech:** Spring Boot, Java 21, MySQL, Bootstrap, jQuery, AJAX,JSON, Firebase, JWT, WebSocket, Swagger UI, Draw.io (ERD design)
- Links: [YouTube Demo](#) | [GitHub Repository](#).

GoPlan – Travel Planning Mobile App | React Native | Expo | Jan 2026 - Feb 2026

Developed an AI-powered mobile travel planning application with user authentication, cloud data storage, and profile management. Generated and processed large travel datasets using Python and integrated cloud-based image storage.

- **Tech:** React Native (Expo), Google Gemini API, Firebase Authentication, Firestore(store travel data), Redux, Python(for create JSON files), Cloudinary(store images)
- Links: [Build APK file](#) | [GitHub Repository](#).

Complaint Management System | Jakarta EE | May 2025

Developed a web application for internal complaint tracking and resolution with role-based authentication and session management. Employees can submit, view, edit, or delete complaints, while admins can view, update status, add remarks, and delete complaints. Implemented using synchronous form-based interactions

- **Tech:** Jakarta EE, JSP, Servlets, MySQL, Apache Tomcat, MVC Architecture, CSS, HTML , jQuery
- Links: [YouTube Demo](#) | [GitHub Repository](#).

Serenity Mental Health Therapy Center Management System | Hibernate | Mar 2025 – Apr 2025

Desktop system Managed patients, therapy sessions, therapists, payments, and reports with BCrypt security

- **Tech:** JavaFX, Hibernate ORM, MySQL, JasperSoft Studio, MVC, Layered Architecture, Factory & Singleton Patterns, Figma
- Links: [GitHub Repository](#).

EDUCATION

Higher Diploma in Software Engineering (GDSE – 72)

Feb 2024 – Sep 2026

- Institute of Java and Software Engineering (IJSE)
